

2024 Workshop Details

Mechanical & Electrified Exit Devices 7:15 AM - 9:15 AM

Get ready for a 2-hour hands-on class with **Allegion** focused on Mechanical & Electrified Exit Devices! Discover the vital significance of life safety and exit hardware in facilities, and dive into the cutting-edge advancements in electrified exit hardware for heightened access control, security, and accessibility. Explore essential topics such as exit device terminology, Von Duprin nomenclature, outside trim options, popular electrified exit devices, conversions, field adjustments, and critical servicing tips. Don't pass up this opportunity to elevate your knowledge and skills in facility safety and security.

Schlage ND Lock Servicing 9:45 AM - 11:45 AM

Unlock the exciting world of Schlage ND Locks with our exclusive 2-hour class taught by **Allegion**! Dive deep into the features, design, and operation of the popular ND Series locks as you assemble and time them for optimal performance. Discover the added access control and monitoring capabilities of the electrified NDEL and NDEU, as well as the electronic NDE locks. Don't miss out on the chance to explore the latest innovation with the NEW Schlage ND Lock with Indicator!

Inox Access Control in a Box 8:00 AM - 9:30 AM | 9:45 AM - 11:15 AM

Join us for an exhilarating 90-minute workshop where you will learn all about Inox Access Control in a Box, the easiest and most budget-friendly access control system on the market! From unboxing to commissioning, this hands-on training will have you feeling like an expert in no time. This will revolutionize your access control installation game!

Prefinished Steel Door Frames 9:45 AM - 10:45 AM | 11:00 AM - 12:00 PM

Join our 1-hour class on Prefinished Steel Door Frames taught by **Timely** experts and upgrade your skills! Learn about the superior performance, features, and installation techniques of these frames compared to standard types.

Norton Auto Operator 8:30 AM - 11:30 AM

This is your opportunity to enhance your knowledge and skills in automatic door operators! Join us for a 4-hour workshop taught by industry expert, Assa Abloy, on Norton Auto Operator. In this comprehensive class, attendees will receive a detailed technical walkthrough of Norton Rixson's low energy operators, covering installation, setup, programming, and troubleshooting using the latest WIFI interface. You will also learn how to configure common applications and gain valuable insights into the Norton Rixson brand. Additionally, the workshop will cover essential topics such as catalog information, product applications, the function of Electromechanical and Electrohydraulic operators, features of the Powermatic Series, and a review of activation types and peripherals. You'll also have hands-on experience with installing and programming the 6000 series.

Understanding Electric Strike and Power Supply Selection 7:15 AM - 9:15 AM

Want to know what to consider in electronic strike selection? **Assa Abloy** will walk you through how to conduct a site survey to determine the correct electric strike for your application. You'll learn to recognize key factors in selecting a strike, how to summarize building codes, and how to match a lockset to an electric strike. We will also discuss storefront openings and all glass hardware changes.

Learn to identify the basic components in an access control system. You will understand how to select appropriate power supplies and coordinate with Division 28 low voltage wiring. We will practice code compliant solutions and teach the requirements for specifying special locking arrangements.

Access Control 9:45 AM – 11:45 AM

In this 2-hour class on Access Control featuring **ASSA ABLOY Aperio** Technology, participants will learn how to easily expand the reach of existing access control systems and secure openings with the innovative Aperio technology. Aperio® technology is a global wireless platform that offers flexibility and cost savings compared to traditional access control systems. The class will cover topics such as OEM Integrations, Hub Technologies, Aperio Devices, Lock and HUB pre-planning including radio coverage, antennas, and wireless surveys. Additionally, participants will learn about lock installation and programming to ensure successful implementation of Aperio technology in various applications. This class provides valuable knowledge for those looking to enhance their access control systems with cutting-edge technology.

Door Closer Installation and Service by Dormakaba 7:15 AM – 8:15 AM | 8:30 AM – 9:30 AM

Get ready to take your door closer skills to the next level with the Door Closer Installation and Service Class by Dormakaba! Dive into the world of closers with in-depth training on overview and installation techniques, door and frame prep tips, and proper adjustment methods.

Continuous Hinge Install by ABH 7:15 AM – 8:15 AM | 8:30 AM – 9:30 AM

Join ABH for a workshop on Hinge Installation! Get hands-on experience installing Continuous Hinges and gain the knowledge you need to select the right hinge for any application.

Lite Kit, Security Sliding Door, and Auto Door Bottom Install 9:45 AM – 10:45 AM | 11:00 AM – 12:00 PM

Hands-on workshop led by **NGP** experts on the installation of Lite kits in doors, Security Sliding Doors, and re-handing Auto Door Bottoms. Learn valuable tips and techniques to enhance the security and functionality of your doors.

Oshkosh Door Jobsite Knowledge 7:15 AM – 8:00 AM

Learn valuable skills such as reading Oshkosh Door labels, conducting thorough door inspections, mastering storage and handling techniques, precise door installation methods, special hardware applications, field fitting doors, understanding door tolerances, and general maintenance tips and tricks. By the end of this class, you'll be a pro at handling Oshkosh Doors with ease and efficiency.

Electromechanical Hardware & Retrofit Installation 7:15 AM – 9:15 AM | 9:45 AM – 11:45 AM

In this hands-on workshop taught by **Command Access** you will learn the essential electronic principles, master the art of connecting loads to power supplies, and build circuits like a pro. With hands-on experience, you'll be connecting electric locks, monitoring switches, and setting up fail-safe locks with ease.

But that's not all - you'll also be installing latch retraction kits for various manufacturers and transforming mechanical hardware into access control openings. Stay ahead of the game by electrifying openings with cutting-edge electronic transfer hinges and loops, latch retraction exits devices, electric locking hardware, dedicated power supplies, and Molex solutions.

Hadrian's Exciting Partition Training! 7:15 AM – 8:00 AM

Uncover the secrets to identifying top-of-the-line toilet partition parts, materials, and hardware types, discover the perfect toilet partitions and accessories to make your business shine and learn how restroom design can elevate your business's image and leave a lasting impression.

Closer Installation and Adjustments 8:30 AM - 9:30

Hager Companies' Technical Support Manager, James Baldanza, is here to take your door closer knowledge to the next level! Join us for an interactive training session where you'll learn how to choose the right closer for any situation, get hands-on experience with installation, dive into detailed adjustments, discuss best practices for troubleshooting, and review Hager's warranty for door closers.

Hager's Locks & Keying | 9:45 AM - 10:45
